1. Know your tripod

2. Retractable Spikes
   As shown in figure, turn the rubber foot in direction “a” until the spike is fully open, turn in direction “b” until the spike is hidden.

3. Leg Extension and Closing
   As shown in Figure, unlock the legs by pulling the flip locks in direction “a” at the same time or separately, then extend the tripod legs to the length you need. Open from the biggest to the smallest leg section. To lock the legs, push the flip locks back to the original position from the smallest to the biggest leg section.

4. Leg Angle Adjustment
   To meet requirements to shoot on uneven terrain, each leg can be adjusted to the three different positions. While holding the center column, place your thumb on the leg angle lock and push the leg slightly towards the center column. While pressing the lower part of the leg angle lock “a”, you can adjust the leg to the second or third position. There is no need to press the leg angle lock when moving from the wider to narrower angle.

5. Macro shooting
   Make sure the Locking Collar is tightened. Unscrew the hook on the bottom of the Center Column by turning in direction “b”. Keep the short center column in place and screw the short center column hook onto the bottom of the short center column in direction “c”. Open the tripod legs to the widest position and you will be able to do macro or low angle shooting.

6. Center column height adjustment

7. Inverting the tripod legs for storage
   Close and lock all of the legs. Loosen the Center Column Lock, raise the Center Column to its highest position and retighten the Center Column Lock. Press and hold the Leg Angle Lock “a” and fold the leg up 180° “b”.

EN Series Tripod Data Chart

---
8. Reversible Center Column
Unscrew the Hook from the bottom of the Center Column and take out the long Center Column. Loosen the center locking collar, take out the short center column from the top. Reverse the long center column, slide it into the collar from the top and lock the collar. Reconnect the short Center Column to the long center column and connect and tighten the hook. ※ Make sure the channel in the Center Column matches the key in the tripod. Twist the Center Column if necessary.

9. Transform your tripod into a monopod
As shown in Figure 9, loosen the rubber locking ring on the top of detachable leg in a clockwise direction “a”, then twist the leg in a clockwise direction “b” and remove the detachable leg (as shown in “c”). Unscrew the mounting plate and screw from the Center Column by turning in a counter-clockwise direction as shown in “d”) and attach them on the top of the leg as shown in “e” and “f”(tighten clockwise). You now have a new monopod. If you want to increase the height of the monopod, you can remove the Center Column and place it on top of the monopod, before attaching the mounting plate and screw.

10. Hook
At the bottom of the Center Column is a Hook that allows you to hang additional weight (sand bag, camera bag, etc.) under the tripod for added stability.

11. Final Locking
After properly adjusting the tripod, use the Allen wrench to tighten the locking screw ("a" and "b") on the Center Column for maximum stability and on the mounting base (when a tripod head is attached) to prevent the head from coming loose unexpectedly.

Attention:
• Do not exceed the recommended load limit of the head and/or tripod. (Please refer to product specifications).
• Please make sure that the locks are securely tightened when in use.
• This product should not be used in environments that exceed the following conditions (-40 ~ +100°C/80 ~ +212°F). And, when used in damp, dirty or dusty environments, please clean and dry thoroughly after use, to assure proper functioning in the future. It is not recommended to expose this product to saltwater. If exposed, please clean with mild soap and warm water and towel dry.
• Please keep from high temperatures and direct exposure to bright sunlight for extended periods of time.
• Please do not leave the equipment alone in a public place, which can be an inconvenience or hazard to others.
• To protect your camera gear, please remove it from the tripod/ball head when transporting from place to place.
• Please use a soft towel with mild soap to clean the locking system and gliding parts, when necessary.
• Under most situations, there is no need to lubricate any parts of this product. The addition of most lubricants will gum up the mechanisms and reduce their normal gliding characteristics. Please call or email us if you have any questions or special needs.
• Please keep this product away from all electrical power sources.
