INSTRUCTIONS
P-306/P-326
Monopod

1. Know your Monopod

2. Leg Extension and Closing
   As shown in Figure 2, twist the rubber leg locks about 90 degrees in a clockwise direction ("a"), adjust the leg sections to the desired length and tighten the rubber leg locks by turning them in a counter-clockwise direction ("c").

3. Retractable Stainless Steel Spike
   Twist the Rubber foot in a counter-clockwise direction ("a"), until the spike is fully extended; to retract the spike, turn in a clockwise direction ("c") until the spike is hidden.

4. Converting the Mounting Screw from 3/8" to 1/4"
   Most camera and lens tripod sockets require a 1/4" screw, while many ball head and medium format cameras require a 3/8" screw. As shown in Figure 3, loosen the Mounting Platform by turning it counter-clockwise ("a"), then twist the Mounting Screw out completely ("b"), flip the screw, twist it back into the monopod (turn clockwise) and hand tighten with the Mounting Platform ("c").

Attention:
Do not exceed the recommended load limit of the head and/or monopod. (Please refer to product specifications.)
Make sure that the locks are securely tightened when in use. For added safety, please put your wrist through the wrist strap when using the monopod.
The product should not be used in environments that exceed the following conditions: (-40°C/0°F to 100°C/212°F). And, when used in damp, dirty or dusty environments, please clean and dry thoroughly after use, to ensure proper functioning in the future. It is not recommended to expose this product to saltwater. If exposed, please clean with mild soap and warm water and towel dry.

Please keep from high temperatures and direct exposure to bright sunlight for extended periods of time.
Please do not leave the equipment alone in a public place, which can be an inconvenience or hazard to others.
To protect your camera gear, please remove it from the tripod ball head when transporting from place to place.
Please use a soft towel with mild soap to clean the locking system and gripping parts, when necessary.

Under most situations, there is no need to lubricate any parts of this product. The addition of most lubricants will gum up the mechanisms and reduce their normal gliding characteristics. Please call or email us if you have any questions or special needs.

Keep this product away from all electrical power sources.

CAUTION!
Do not place the monopod with camera attached, over your shoulder or carry the monopod horizontally by the leg. Strong shaking may cause damage to the screw in the mounting plate and/or the camera. Please extend the leg from the biggest tube to smallest tube; close the legs from the smallest tube to biggest tube, to avoid sag and leaning damage.

Specifications are subject to change without notice.
