1. Know Your Ball Head

GX Series:

![Diagram of GX Series Ball Head]

2. Attaching Your Ball Head

a. To attach the ball head onto the tripod, you must make sure that the mounting screw of your tripod is 3/8". If it is 1/4" you will need to get a 3/8" screw or adapter. Many professional tripods have reversible screws. Please check your tripod manual for more details.

b. Lock the Panning Base Knob by turning it in a clockwise direction. As shown on Figure 2-1 & 2-2, align the 3/8 thread hole at the bottom of the Ball Head with the mounting screw on the tripod. Hold by the base of the Ball Head and rotate in a clockwise direction until it is locked tightly.

3. Know your Quick Release Clamp and Quick Release Plate

4. Attaching and Removing the Quick Release Plate

a. Attaching the QR Plate to Your Camera

Select the QR Plate that matches the base of your camera. (To prevent excessive wear to the camera's tripod socket, you should not frequently attach and remove the Quick Release Plate. It is quite common to leave the QR Plate permanently attached to the camera.)

The side of the quick release plate with the slide-proof rubber mat must be facing the base of the camera. Make sure the QR plate screw aligns with the tripod socket on the bottom of the camera.

Position the QR plate on the camera body and tighten the screw with a coin or allen key. If you plan to keep the quick release plate on your camera for a long period of time or you are using medium or large format cameras, you should tighten the screw with the allen key.

b. Attaching the camera with QR Plate onto the Ball Head

Slightly loosen the Clamp Locking Knob by turning it counter-clockwise, slide the QR Plate laterally into the Quick Release Clamp (Figure 4-1) and tighten the clamp by turning clock-wise. Another method is to fully open the Clamp Locking Knob and place the plate in from the top (Figure 4-2). Tighten the knob to lock the camera in place.

c. Security Pin on the Quick Release Clamp

There is a safety lock on the top of the Quick Release Clamp that effectively prevents the camera from sliding off of the clamp if it is slightly loosened (Figure 4-3). This allows you to make minor adjustments of the camera position on the ball head without worrying about the camera sliding off of the Quick Release Clamp. This feature is available with all Sirui QR plates. (Warning: While other styles of QR plates can...
Announcements

- Do not exceed the recommended load limit of the ball head and/or tripod. (Please refer to product specifications)
- Please make sure that the locks are securely tightened when in use.
- This product should not be used in environments that exceed the following conditions (-40 ~ +100°C/40 ~212°F).
- When used in damp, dirty or dusty environments, please clean and dry thoroughly after use, to assure proper functioning in the future.
- Please keep from high temperatures and direct exposure to bright sunlight for extended periods of time.
- To protect your camera gear, please remove it from the tripod/ball head when transporting from place to place.
- Prevent sand, grit and other foreign matter from getting into the interior of the Ball Head. If the Ball Head does not move smoothly, please use a clean, soft cloth to gently wipe the Ball mechanism.
- There is no need to lubricate any parts of this product. The addition of lubricants will gum up the mechanisms and reduce their normal gliding characteristics. The construction of Sirui professional Ball Heads is very precise, so extra maintenance is not needed.

Note: the Quick Release plate has a strap holder that allows you to attach many popular camera straps directly onto the plate. Please make sure that the Quick Release plate is securely attached to the camera, to prevent the possibility of the camera detaching from the plate. Please check this attachment regularly.
