1. Know your tripod

2. Leg Extension and Closing
   As shown in Figure 2, twist the rubber leg locks about 90 degrees in a clockwise direction ("a"), adjust the legs to the desired length ("b") and tighten the rubber leg locks by turning them in a counter-clockwise direction ("c").

3. Leg Angle Adjustment
   To meet requirements to shoot on uneven terrain, each leg can be adjusted to three different positions. While holding the Center Column, place your thumb on the Leg Angle Lock and push the leg slightly towards the Center Column. While pressing the lower part of the Leg Angle Lock ("a"), you can adjust the leg to the second or third position. There is no need to press the Leg Angle Lock when moving from the wider to narrower angle.

4. Center Column height adjustment
   Place the tripod on the floor, loosen the Locking Collar by turning in a counter-clockwise direction ("a") and adjust the Center Column to the desired height ("b"). Retighten the locking collar by turning in a clockwise direction ("c").

5. Low-angle and Macro Shooting
   Unscrew and remove the center column in direction "a". Unscrew and remove the mounting plate and mounting screw. Screw the mounting plate and mounting screw onto the Tripod Base and tighten. Open the tripod legs to the desired position for low-angle or macro photos (see figure C).

6. Hook
   At the bottom of the Center Column is a Hook that allows you to hang additional weight (sand bag, camera bag, etc.) under the tripod for added stability.

7. Inverting the tripod legs for storage
   Close and lock all of the legs. Press and hold the Leg Angle Lock ("a") and fold the legs up 180 degrees ("b").

Attention:
- Do not exceed the recommended load limit of the head and/or tripod. (Please refer to product specifications.)
- Please make sure that the locks are securely tightened when in use.
- This product should not be used in environments that exceed the following conditions: (-40 ~ +100°C) / (40 ~ +122°F). And, when used in damp, dirty or dusty environments, please clean and dry thoroughly after use, to ensure proper functioning in the future. It is not recommended to expose this product to saltwater. If exposed, please clean with mild soap and warm water and towel dry.
- Please keep from high temperatures and direct exposure to bright sunlight for extended periods of time.
- Please do not leave the equipment alone in a public place, which can be an inconvenience or hazard to others.
- To protect your camera gear, please remove it from the tripod head when transporting from place to place.
- Please use a soft towel with warm water and mild soap to clean the locking system and gliding parts when necessary. Towel dry before storing the tripod.
- Under most situations, there is no need to lubricate any parts of this product. The addition of most lubricants will gum up the mechanisms and reduce their normal gliding characteristics. Please call or email us if you have any questions or special needs.
- Please keep this product away from all electrical power sources.

CAUTION

Please remove the camera from the tripod when changing the position of the tripod. Do not place the tripod, with camera attached, over your shoulder or carry the tripod horizontally by the legs. Strong shaking may cause damage to the screw in the mounting plate and/or the camera. Please extend the legs from the biggest tube to smallest tube, close the legs from the smallest tube to biggest tube, to avoid leg joint bushing damage.

Specifications are subject to change without notice.
