1. Know Your Strap

2. Spread open the strap on the side with the Adjusting Loop and place it over the top of the tripod (Figure 2). Pull the strap through the Adjustment Buckle (Figure 3) and pull the strap tight (Figure 4).

   Spread open the strap on the other end of the strap and place it around all three tripod legs (Figure 5). Pull the strap through the Adjustment Buckle (Figure 6) and pull the strap tight (Figure 7).

3. The tripod can be easily and conveniently carried on your shoulder during travelling or shooting without the tripod bag. If you plan to be shooting, place the strap around only one leg so you can setup the tripod without the need to remove the strap from the tripod.

   Caution: to prevent damage to your equipment, remove the camera from the tripod while travelling from place to place.

   If you plan to carry the tripod in the tripod bag, attach the strap to the quick connect carabine hooks on each end of the case.
